*: repetitive during the experience

Note

Folder mix composition

1. **Main_them_window** before starting / beginning the user journey
2. **Room_theme_down** Changing perspective from the screen to room bg melody

Folder Mix effects

Bins in/ out sound could be changed as normal UI sound if you prefer.

I just retouched the volume and a bit of noise cutter/ reverb in some of it.

+Since the scene isn't done it is hard to put the theme, composing however, if you find to add more sound after you finished it you can send me the file by 3rd of August.

+Missing file - interview / voice file : it seems fine since you didn't do record real voices so you could just keep it like that.
