*: repetitive during the experience

Note

Folder Bg

1.Main theme could be in the beginning and in the ending with the door opens, closes (2 times or just in the beginning once)

2.ppl talking back simple melody when there are talking time during the journey

3.bg music could be coming in the end (if you want to make it a different theme) or it could be in the end with the receipt !

Folder Effect

When you select the object rather than 'tap'sound puzzle sound could be playing I made 6 different sounds so you can put several. And when the background visual is red from the beginning the user clicks it and zooms in the object and pulls the card 'red_zoom_in / out sound can be playing' also for the green.

1. **Red part (Beginning-03:57)**
2. **Green part (03:58-ending)**

Folder elements

I retouch the volume to make it equal, and just made some more pitch different rewinding sound

Folder Interviews

I mixed it manually to make it sound better. However, the recording was pretty bad so it is the best. Up to you using your automatic cutting sound voices or these! Next time I recommend you to record in an isolated place for the vocals.

- ** tap sound -> wrong button 1, 2
- ** snap down -> puzzle 1,2,3,4,5,6
- **smash -> smash new

++ if you want to put some sound for the card, finding fx and can send me **by 3rd of August**
